What Personal Data Does Logtivity Record?

Activity Logs · https://logtivity.io/docs/personal-data/

You can control what personal data is stored by Logtivity. In this guide, we'll show you how to configure the Logtivity plugin' data storage:

- Inside your WordPress site, go to "Tools" and then "Logtivity".
- You can uncheck these boxes to stop Logtivity from recording personal data:

- **Store User ID**: If you check this box, when logging an action, we will include the users User ID in the logged action.
- **Store Users Profile Link**: If you check this box, when logging an action, we will include the users profile link in the logged action.
- **Store Users Username**: If you check this box, when logging an action, we will include the users username in the logged action.
- **Store Users IP Address**: If you check this box, when logging an action, we will include the users IP address in the logged action.
