How to Add Users to Logtivity

Accounts / Plans · https://logtivity.io/docs/users/

In Logtivity, your websites are organized into "Teams". Each team has it's own subscription plan and can have extra users.

You can add more users to each Team by going to "Team Settings" then "Users".

On this screen, you can send invites to new users. Each user can be invited to the "Standard" or "Admin" role.
